

Technical Advisory Bulletin (TAB)

Bulletin #: TBMELCO17A

February 9, 2017

Product: Melco Operating Software (MOS)

Implementation: ☐ Urgent ☐ Mandatory ☐ As Required ☒ Info Only

Reference: EC3363

Subject: Release of MOS with Virtual Security

SITUATION:

Melco released the latest version of MOS, version 11.07.084, with a virtual security system.

SOLUTION:

With the virtual security for MOS, the same security system that has been part of Design Shop for a while now, physical dongles are no longer required nor shipped with the MOS software.

MOS version 11.07.084 was released on Jan. 30, 2017, and started shipping with the EMT16 PLUS machines.

First time OS software installation instructions have been updated to cover the installation process for the virtual security system.

NOTE:

BRAVO OS still requires the physical dongle and all remaining open orders for new factory EMT16 machines are being shipped with a physical dongle as well. However, in all these cases the same version 11.07.084 is being shipped.
